

Production Manager (m/f)

Job Description: Production Manager

Job Location: Bangalore, India

Industry: Steel processing (profiling)

Opportunities exist within the ArmesMaini Ltd a member company of a global logistics solution manufacturing group Ferretto Group Spa Italy, for the appointment of Plant, Production Manager.

The candidate will have a clear focus on quality, efficiency and effectiveness with a continuous improvement mind-set and company goals focus.

In addition to achieving set objectives, a key aspect of these positions will be the effective management of a team of employees in each operational area.

The candidate must be able to set clear targets, evaluate, measure and develop employees to reach their potential, while managing key performance indicators.

Job Profile:

As the Production Manager, you will be involved with the planning, coordination and control of manufacturing processes.

You will make sure the goods and services are produced efficiently and that the correct amount is produced at the right cost and level of quality.

- It is your responsibility to ensure that your entire department is working efficiently.
- Manage the activities of a Production department, consisting of more than one sub-team, with consideration for the goals and objectives of the organization.
- Develops goals and objectives for the department that are aligned with those of the larger manufacturing organization.
- Develop, define, and lead the implementation of plans, actions, and measurements to meet department goals.
- Measure and evaluate execution of the plans and make appropriate adjustments to meet the aligned goals and objectives.
- Maintain knowledge of the existing manufacturing systems including the computer systems, steel making processes, material flow and handling schemes, quality systems, and process control techniques.
- Evaluate and recommend new equipment, and process and maintenance technologies.
- Define and communicate performance expectations for staff and coach and counsel them in the performance of job responsibilities.
- Develop and manage departmental budget.
- Perform all other duties and special projects as assigned.

Skills:

- Bachelor's degree in Mechanical Engineering with minimum 5 years production experience.
- Experience from plate/coil steel/metal processing / stainless steel.
- Planning and organization skills to be able to run and monitor the production process.

- The ability to act decisively and solve staff or equipment related problems.
- Experience using Microsoft Office Package, Navision, AutoCAD and Inventor programs.
- The ability to communicate clearly and persuasively with your team, colleagues and clients.
- Strong negotiation skills for getting materials within budget and at the right time.
- Experience in managing teams
- Experience in industry process analysis and change control
- Excellent command of English Language in writing, reading and speaking
- Knowledge of Italian language - preferable
- Working in international environment is an advantage
