

Senior Frontend Engineer

Description

We're searching for a front-end developer to help us create amazing products that affect the workplace of hundreds of companies around the globe. As a front-end developer, you will contribute to developing new user-facing features and will take care of building reusable codes and libraries for future use. You will also be responsible for ensuring the technical feasibility of UI/UX designs and optimizing applications for maximum speed and scalability.

Requirements

- Experience in React and React Native.
- Experience in LESS, SASS or SCSS.
- Experience with bundle/build systems.
- Experience with test frameworks like Jest or Mocha.

Responsibilities

- Produces, maintains and modifies web applications and user interfaces.
- Makes sure that produced software follows good coding practices.
- Identifies and troubleshoots various web application issues and coding problems.
- Develops features to enhance the user experience.
- Builds reusable code for future use.
- Ensures web applications are accessible across many platforms, including laptops and smartphones.
- Optimizes web applications for maximum speed and scalability.
- Attends training and education.
