

Electrical designer (m/f/d)

To strengthen our team at the location Roding we are looking for:

Electrical designer (m/f/d)

Your area of responsibility:

- You take on the administration of EPLAN P8 and its sub-systems
- You will train employees at our locations around the world
- You process and create equipment in EPlan P8 in accordance with our standards
- You create the electrical documentation, circuit planning documents, etc.

You convince us with:

- Your already successfully completed degree in electrical engineering / mechatronics or a technical apprenticeship
- Your very good knowledge of EPLAN P 8 that you already have
- Your distinctive hands-on mentality and your solution- and result-oriented way of working
- Your experienced handling of MS Office and your first SAP knowledge
- Your good written and spoken English skills
- Your reliability and ability to work in a team complete your profile

We offer you:

- Attractive additional financial benefits such as vacation pay and health bonuses
- Subsidy for company pension schemes and occupational disability insurance
- Individual support from the Muehlbauer Academy with internal and external training measures
- Employee events (e.g. Christmas party, folk festival visit and barbecue)
- International work environment - opportunities for temporary assignments abroad
- At the Roding location, you can also expect: Appropriate meals in the company canteen, support in finding accommodation
- You can find many other advantages on our homepage

Have we raised your interest?

We look forward to receiving your application documents. If necessary, we will distribute your personal data as part of the application process within the Muehlbauer Group.
