Junior Electrical Engineer

Job reference
IAE004

Job title and location
Junior Electrical Engineer, Sarajevo

Key Responsibilities / Missions

- Design of MV and LV power distribution systems, grounding and lighting systems.
- Preparation of technical specifications and material requisitions for purchasing electrical equipment.
- Ensure that the work carried out within the limits of your responsibilities is in line with our procedures.
- We expect you to do on your own initiative in consultation with an assigned Project Specialist Leader (PSL), whatever is required to fulfil the above activities.

Profile

- We are looking for a junior Electrical Engineer in our IAE department.
- Experience with typical office tools (MS Office or equivalent). Preferably candidate should be familiar with standard engineering tools AutoCAD, Microstation.
- It is preferred that you have a degree at university level (Power Systems or similar) and good knowledge of the English language. Knowledge of other European languages is desirable.
- Working experience in similar field is desirable but not mandatory.
- We expect you to be flexible and pro-active and you must be a team player.
- Available for short and medium term abroad jobs.

Personal character traits:

- Willingness to learn new skills.
- Self motivated.
- Persistence in identifying and resolving problems.

We offer

- An informal and friendly working atmosphere.
- Dynamic and challenging assignments.
- International exposure.
- Trainings in targeted field of interest.
- Opportunities for career growth.

Please send your Curriculum Vitae to job@simecomilano.ba with job reference of position you're

applying for.
