

Backend Engineer

Job Title: Freelance Backend Engineer

Company: Pflegewerk Managementgesellschaft mbH

Location: Remote / Bosnia

Job Type: Freelance Full-time

Position Overview:

As a Backend Engineer at Pflegewerk, you will play a key role in designing, developing, testing, and maintaining services for Backend. You will collaborate within a cross- functional team to deliver and deploy services in a seamless experience, staying up-to-date with the latest trends in backend development.

Responsibilities:

- Collaborate with cross-functional teams to define, design, and ship new features for our Backend.
- Develop testable, maintainable, and efficient code.
- Design RESTful API and database Postgresql schemas.
- Conduct code reviews to ensure code quality and adherence to best practices.
- Stay current with industry trends and technologies, and propose new ideas for continuous improvement.
- Work closely with product owners and stakeholders to understand project requirements and deliver solutions that meet business objectives.

Qualifications:

- Bachelor's degree in Computer Science, Software Engineering, or a related field.
- Experience in Nest.js/Node.js and Typescript.
- Experience designing and developing RESTful APIs.
- Experience with GCP or any other public cloud providers.
- Experience working with Git and code-sharing environments like Gitlab or similar (Atlassian tools or GitHub).
- Strong understanding of the full development life cycle.
- Strong communication and collaboration skills.
- Proficient English. German is nice to have.

Nice to Have:

- Experience with IaC, especially Terraform.

- Experience developing CI/CD pipelines.
- Experience with serverless microservice architecture.
- Knowledge of agile development methodologies.
- Contributions to open-source projects or personal projects.
