

Junior Cyber Security Specialist (m/f)

Beijer Ref, a Swedish company with a global presence and a world-leading wholesaler of cooling technology and HVAC, is seeking a Junior Cyber Security analyst to join our team. Although you will be based in the office of Deltron, a company within the Beijer Ref Group in Croatia, your role will focus exclusively on Beijer Ref's global projects. You would support our global security operations and safeguard our company's digital assets. In this role you will work closely with the Global Cyber Security Manager and Global CIO also including other local stakeholders to implement security policies, monitor systems, and mitigate risks in a fast-paced global environment. You will have the opportunity to:

- Develop your technical and cyber security skill sets
- Build and shape security tooling and help with ongoing global and local security initiatives
- Challenge yourself to utilise industry leading tools
- Help build the team culture and be part of a greater global team

This is a great opportunity to build upon your existing technical knowledge and skills and grow your career in a dedicated cyber security role. Your responsibilities will include:

- Monitoring: Assist in the monitoring and management of security events from multiple sources including but not limited to events and follow up from global EDR SOC, email monitoring tools and other security monitoring tools
- Onboarding: Support the onboarding process for new security tools and technologies, ensuring seamless integration into existing systems
- Periodic Training: Contribute to the development and delivery of periodic security training sessions for staff, raising awareness of best practices and security policies
- Incident Response: Participate in incident response activities, helping to investigate security incidents and implement appropriate remediation measures; stay updated with the latest cybersecurity trends and threats, advising the team on appropriate countermeasures
- Documentation Maintenance: Maintain and update security documentation to ensure compliance with relevant regulations and standards, including incident reports, security policies, and procedures; collaborate with IT, legal, and business teams to ensure security is integrated into all business processes
