

Civil Engineer (m/f)

JOB DESCRIPTION

Civil Engineer
Sarajevo

PURPOSE

CT-Technologies are looking for a civil engineer with experience in the construction industry to join the engineering team in Sarajevo.

OBJECTIVES

- Provide technical support to the organisation.
- Ensure CT-Technologies is at the front in the market as regards technical know-how including technical documentation.

RESPONSIBILITIES

- Design and oversee projects related to Cold Stores and Food Processing Plants.
- Undertaking complex and repetitive calculations.
- Finding solutions to overcome unforeseen construction difficulties.
- Liaising with clients and a variety of professionals including suppliers and project managers.
- Resolving design and development problems.
- Support the Project Management team as regards design, product selection and execution.
- Ensure that technical documentation is correct and updated.
- Following technical developments within CTT's area and propose new products, solutions, installation systems, safety issues etc.
- Assessing the sustainability and environmental impact of projects.
- Supporting sales by finding solutions to new requirements/challenges.

QUALIFICATIONS AND REQUIREMENTS

- Minimum education: B.Sc. Civil Engineer.
- Minimum 2-3 years of experience within building construction. Preferably in relation to Cold Stores and Food Processing Plants.
- Excellent AutoCAD experience.
- Experience in structural calculations (preferably sandwich structures)
- Good computer skills (Microsoft Office).
- Excellent English skills, both verbal and written.
- Attention to details.
- Team player.

- Willing to travel.

ABOUT CT-TECHNOLOGIES
